A Note to Parents and Other Adults:

As closely as we can determine, these books are all on a third grade reading level. A third grade reading level, however, is a fairly wide range going from what the average third grader can read at the beginning of the school year to what she can read at the end of third grade. And many third graders read at a higher or lower reading level than is included in this range.

Please don't hesitate to consult our list of books written on a second or fourth grade reading level. And if you're looking for more titles written on a third grade reading level, check out the list for third grade boys. There's a lot your child may enjoy on that list also.

Books have been placed on this list based on the reading level determined by the publisher, reviewers, or by our librarians. Don't be misled by the number of pages a book has. Sometimes books with more pages have less text, because at this level many books contain full-page illustrations.

For the most part, we have included only one book per author on these lists. If your child enjoys a particular book, she might also enjoy other books by the same author, especially books in the same series.

If you would like to know the Lexile reading level of any of these books, or if you would like further reading recommendations or help finding these books, please talk to a librarian at the Help Desk. Happy Reading!

Young readers can use the 5 finger test to check their understanding of a book:

Open the book to the middle and choose a page of text to read. Read the page (aloud if possible). Hold up one finger for every word you do not know or cannot pronounce.

No fingers:	This book may be too easy for you.
1 Finger:	This book is o.k. for you.
2 Fingers:	Still good.
3 Fingers:	Could be a bit hard for you to understand.
4 Fingers:	May be difficult to read and understand.
5 Fingers:	We suggest you choose another book.
