

WINDOWS DEFENDER BASICS

Windows Defender Pros

- ◇ Free
- ◇ Easy to use
- ◇ Searches for both Spyware & Malware
- ◇ No ads or extras
- ◇ Considered effective and secure

Windows Defender Cons

- ◇ Less customization
- ◇ Slower scan speed
- ◇ Can miss threats
- ◇ Less robust and powerful than paid-for-services

Scan Settings

Quick- Basic scan, typically 30min-2 hours, scans most common virus prone areas

Full – Scans every file on the computer, typically lasts 2-4 hours

Custom – Specify certain locations

Types of Viruses

Malware is short “malicious software” and is a virus used to disrupt the actions on your computer and/or steal private information.

Spyware is a virus that’s purpose is to gather and transfer information about you. This includes Trojan viruses, adware, and cookies.

Trojan Horse, Either Malware or Spyware this virus sneaks into your computer, typically during other downloads and crashes your computer or holds files for ransom.

WINDOWS DEFENDER BASICS

Schedule a Scan in Windows Defender

Windows Defender regularly scans your PC to help keep it safe. It tries to do this while you're not using your PC, so it doesn't interfere with your work. You can also schedule Windows Defender to scan at a time and frequency that you choose.

1. Search for **Schedule Tasks** in Cortana and open.
2. In the left pane, expand **Task Scheduler Library > Microsoft > Windows**, and then scroll down and double-click (or tap) the **Windows Defender** folder.
3. In the top center pane, double-click (or tap) **Windows Defender Scheduled Scan**.

Name	Status	Triggers	Next Run Time	Last Run Time	Last Run Result	Author	Created
Windows Defender Cache Maintenance	Ready			2/13/2017 8:47:50 AM	The operation completed successfully. (0x0)		
Windows Defender Cleanup	Ready			2/13/2017 8:47:50 AM	The operation completed successfully. (0x0)		
Windows Defender Scheduled Scan	Ready			2/13/2017 8:47:50 AM	The operation completed successfully. (0x0)		
Windows Defender Verification	Ready			2/13/2017 8:47:50 AM	The operation completed successfully. (0x0)		

4. Select the **Triggers** tab, and then select **New**.
5. Specify how often you want scans to run and when you'd like them to start.
