MAKERY PROJECT: 3D Printed Succulent Pot

TIME: 15 minutes (does not include print time) SKILL: Beginner

Custom decorate your house using the Makery's 3D printer. No 3D design experience is required. Did we mention you get to chose the color?

Note: Children younger than middle school must be directly supervised by an adult.

COST FOR 3D PRINTING
10¢ per gram, \$1 minimum

Materials You Need to Bring

NOTHING!

Equipment Provided in the Makery

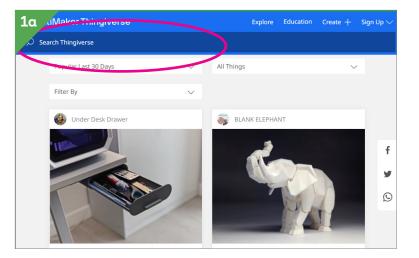

3D PRINTER

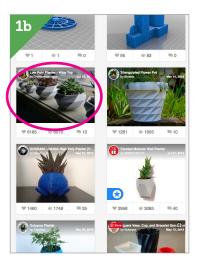

PLA FILAMENT

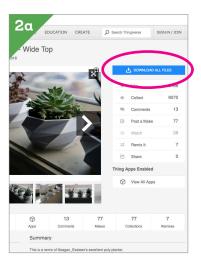

TIPS:

- You can use this tutorial to 3D print anything from <u>Thingiverse.com</u> in the Makery. Just substitute you own search terms in place of "pot planter" in step 1.
- Design your own at TinkerCAD.com
- You can paint your 3D print!
- Time and size limits apply. See all restrictions at <u>elmlib.org/3D</u>.

FIND:

- Visit **thingiverse.com** and search for "pot planter" or any other design you like. Scroll and click on the result you would like to print.
- **b.** If you want to print the exact pots pictured, use the title on the photo found on the reverse for your search.

2 PREP:

- Click the blue button [Download All Files] and save the file to your computer. Unzip the downloaded file by double-clicking the icon (Mac) or by right-clicking and selecting "Extract All" (Windows).
- **b.** There may be multiple files in your downloadchoose one that ends in: .stl or .obj

3 SEND:

In a browser window, go to elmlib.org/3D and fill out the form and click Submit. You will receive an email confirming we got your file.

4 PICK UP:

Printing is done by Library staff and is attended to on a first come, first served basis. Please allow one week for us to complete the print.

We send an email once the print job is ready for pickup. If a 3D print is not picked up after 30 days, it becomes the Library's property and may be discarded. You are still responsible for the cost.
