

Apple iCloud

Check your phone for backups

Make sure to check when your phone was last backed up. If your phone or iPad is not consistently synced with iCloud, you could lose all the information since the last backup date when replacing a lost or old device.

To check when your device was last backed up go to: **Settings -> General -> Storage & iCloud Usage -> Manage Storage**

iCloud Upgrades

Ways to save space

1. Delete extra or unwanted photos and videos
2. Manage your sync backup settings, such as deselecting apps, notes and other features on iCloud
3. Delete additional phone backups that may have been saved
