

What is “streaming”?

Streaming service content is transmitted in real time over the Internet and requires web connection.

Streaming vs. downloading?

Streaming needs the internet, but does not require a lot of memory or software

Downloading content mean you can access it any time or place, but you need storage and platform software

Hoopla	Indieflix	MyMediaMall
<ul style="list-style-type: none"> • Feature content – Movies, TV Shows, Music, and Audiobooks • For all ages • No waiting lists! • No software; may need Widevine Media Optimizer plugin • Downloading possible on mobile devices only • App 	<ul style="list-style-type: none"> • Independent content – Movies, shorts, documentaries • For all ages • No waiting lists! • No software • No app 	<ul style="list-style-type: none"> • Smallest collection – A little of everything • For all ages • No waiting lists! • Software needed; OverDrive Media Console • App
